

September 16, 1985

TO: File

FROM: Everett Hooper, Reclamation Soils Specialist 

RE: St. George Mining Corporation, Apex Mine, ACT/053/004,
Washington County, Utah

On August 23, 1985, the Apex Mine site was inspected by Everett Hooper from the Division Staff. In all, the mine site looked clean and well kept although two areas of concern were noticed: (1) an unpermitted "bone yard" or storage; (2) a large concrete bin wall.

The bone yard was to have been reclaimed in the fall of 1984 but is still in active use. The bin wall poses no problem other than it does not seem to be included in the bond estimate.

Mr. Lutz Klingman should be contacted and informed that the storage site must be permitted or reclaimed this fall. Further, the bond should be checked to insure the concrete bin wall has been included.
